

A New P2 Drive for Windows or Mac Use That Improves P2HD Workflow by Transferring Data at 1.0 Gbps or Higher*

Panasonic's AJ-PCD35 Memory Card Drive is a P2 drive with a PCI Express interface. It connects to a Windows PC or Mac with the supplied board, and transfers data at a speedy 1.0 Gbps or higher*. It takes full advantage of the P2 card's high-speed read/write performance, and dramatically speeds up workflow, particularly for HD production. Five P2 card slots let you mount up to five cards simultaneously.

The AJ-PCD35 can be built into a 5-inch bay of a PC or used externally, and boasts exceptional reliability because it has no transport mechanism and uses solid-state memory cards.

*The actual transfer rate varies depending on the file being transferred, the system, the application software, the P2 card version and other conditions. When a 4-GB or 8-GB P2 card is used, the maximum transfer rate is limited to about 800 Mbps.

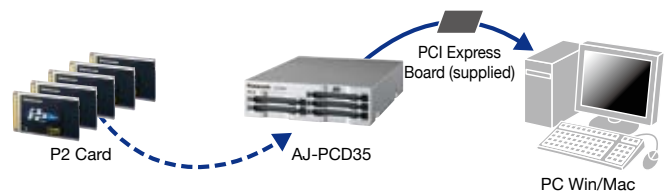

AJ-PCD35 Memory Card Drive with PCI Express I/F

High transfer rate of 1.0 Gbps or higher*

With the large files used in HD production, the file transfer speed is one of the factors that make the workflow either smooth and easy, or frustratingly slow. The new AJ-PCD35 P2 drive provides an outstanding transfer rate of 1.0 Gbps or higher*¹. It connects to a Windows or Mac with the supplied PCI Express board*² to bring extra comfort to high-quality P2HD production.

*¹: The actual transfer rate varies depending on the file being transferred, the system, the application software, the P2 card version and other conditions. When a 4-GB or 8-GB P2 card is used, the maximum transfer rate is limited to about 800 Mbps.

*²: The P2 card driver (supplied with the product) must be installed. For details, refer to "P2 Support and Download Information" on the Panasonic Website <<https://www.pavc.panasonic.co.jp/pro-av/>>.

Rear Connector

P2 Drive Features and Specifications

- Five P2 card slots let you mount up to five cards simultaneously.
- Can be installed into the 5-inch bay of a desktop PC (Windows) as an internal drive*.
- Can be used as an external drive with the supplied AC adaptor and interface cable.

*The AJ-PCD35 cannot be installed into the 5-inch bay and used as an internal drive if the PC does not allow the PCI Express cable to be inserted into the slot that is intended for the PCI Express board. In this case, you will need to use the AJ-PCD35 as an external drive.

*The shape of the plug depends on the countries/regions.

Specification

Power Source:	DC 16 V, 0.6 A (with AC adaptor) DC 12 V, 0.8 A (when PC built-in)
AC adaptor:	AC 100 V-240 V (1.20 A), 50 Hz/60 Hz
Weight:	1.2 kg (2.6 lbs)
Dimensions:	W 148.4 mm x H 42.5 mm x D 199.5 mm (5-7/8" x 1-11/16" x 7-7/8") excluding protruding parts
Operating Temperature:	0 ° C to 40 ° C (32 ° F to 104 ° F)
Operating Humidity:	10 % to 80 % (no condensation)

PC System Requirement:	Microsoft® Windows XP Professional (SP2, SP3) (Windows XP Professional x. 64 edition is not supported.) Microsoft® Windows Vista Business (later SP1) Mac OS X 10.4.11, 10.5.5 (Intel Mac) 1GB or more memory
Interface:	PCI Express® Rev 1.1 (with PCI Express board)
Card Slot:	PC Card Type II x 5 (CardBus standard)

Specifications and functions are subject to change without notice.
