

Ideal for supporting **ENG** dockable camcorders or **EFP** cameras equipped with long focal lenses and top mounted viewfinders, the **DELTA** is manufactured with an extensive use of ultra-light magnesium alloy.

The fully variable counterbalance system is designed to accommodate offset payloads of 22 Kg (48 lbs) ensuring excellent performances at any tilt angle.

The **DELTA** features a continuously adjustable fluid damping mechanism providing extremely smooth and precise camera movements.

Standard performances of +70, -60 degrees, with the European style quick attachment camera plate, can be increased to +/- 90° with the optional sliding base plate.

Powered by a 9v battery, two digital displays indicate the counterbalance and tilt drag values, while an illuminated spirit level allows easy set-up even in low light conditions.
