

Reporter 400D

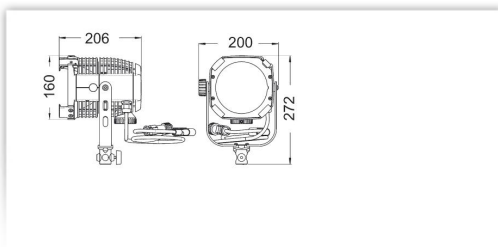

Daylight for every assignment

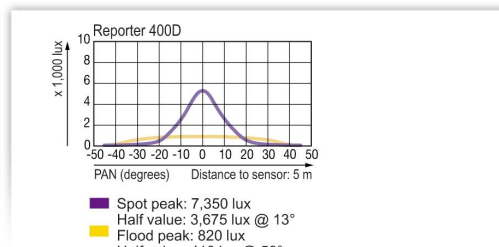

This open face daylight lamp, used with mains control gear, is ideal for a wide range of requirements. The Reporter 400D is protected from rain and a safety switch keeps it from being switched on by accident when open. The light features compact design, low weight and high light efficiency (see diagram). It can be switched on at the light head or from the control gear. Users appreciate the silent operation and that there is no need for tools when changing bulbs.

Technical Facts
