

SIZE MATTERS.

Despite being the size of a key fob, the unique Switch*i*R infra-red remote controller unit can control all the user settable functions of the TX2040 and HX2040 units. With just four buttons, an LCD display and a simple menu system, sound technology has never been so accessible.

FUNCTIONS INCLUDE:

- Frequency check and change
- Audio level – mic gain control on TX2040 – check and change
- Low frequency cut – On/Off set
- Battery status of receiver/transmitter
- Battery status of Switch*i*R
- Check 6LR61 type 9V batteries externally
- Check serial number of unit
- Check user identification
- Infra red disable
- Turn Off/On transmitter

The Switch*i*R, when combined with the miniTX, TX2040 and HX2040 units, adds up to one of the most simple-to-use, yet versatile, high quality audio systems on the market.

Size	60(l) x 30(w) x 12(max d)mm
